KEY TAKEAWAYS

- ➔ The average job posting in this industry receives a high amount of applicants, and employers invite a high percentage of them to interview. However, very few of these interviews result in hires – at only 4%, this is the lowest interview-to-hire rate of all industries in our study. If you're looking to improve your results, **use text recruiting to send clear follow-up information (such as interview reminders) after an applicant applies to keep them engaged throughout the hiring process.**
- ➔ **Custom sources have proven to be a highly successful recruiting method** for this industry. In 2021, cleaning service businesses used custom sources including referral emails to customers, state department of labor websites, and local chamber of commerce websites.
- ➔ Cleaning service businesses are underutilizing an untapped source of high quality applicants – referrals. While referrals bring in less than 1% of applicants in this industry, they convert to hires at a staggering 25%. You can **increase the quality of your applicant pool by asking your existing employees and customers for referrals.**

How to Improve Your Hiring in 2022

2021 was a rollercoaster year for recruiting, but we've gained insights into what steps businesses can take now to hire top talent regardless of the state of the job market.

1. Build your employer brand and showcase it on your careers page.

Company careers pages are a hugely successful source of hires, but an untapped source of applicants overall. Candidates who take the time to research a company tend to be high-quality candidates who are more selective about where they choose to apply. Invest in creating an engaging and attractive [careers page](#) that showcases [employee testimonials](#), aspects of your company culture, and your [core values](#).

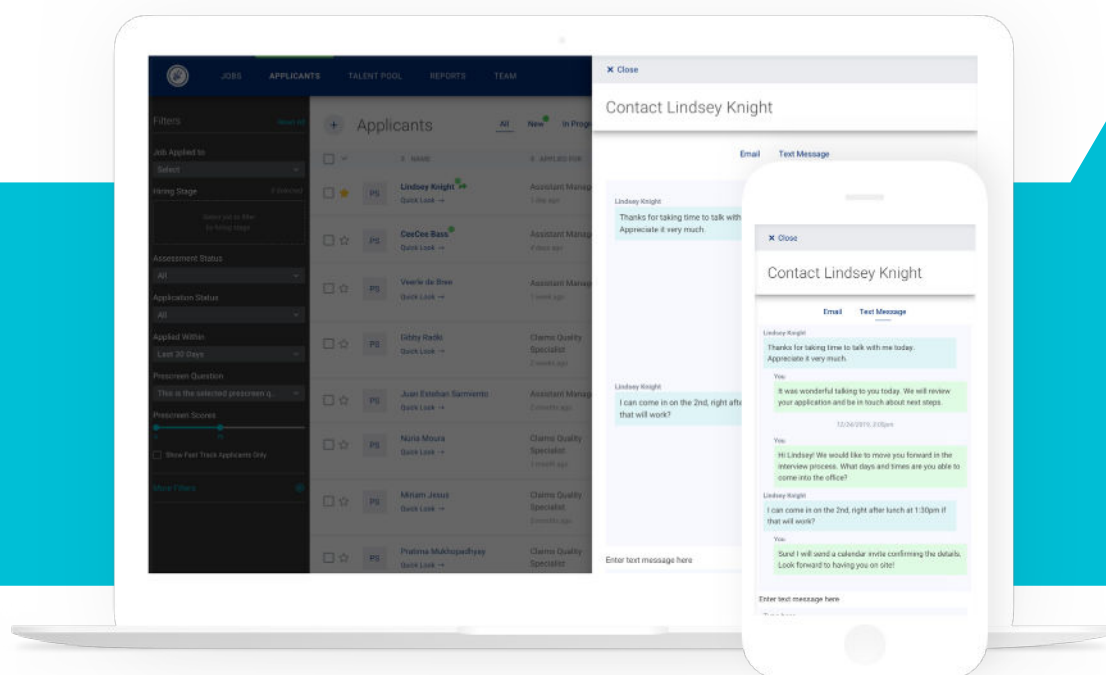

2. Create better job postings to stand apart from your competitors.

In 2021, we frequently heard from employers who were [concerned about the declining number of applicants](#) to their jobs. But our data shows that job postings received just as many views per job as in 2020 – however the number of applicants per job was cut nearly in half. This tells us that **job seekers are seeing your postings, they're just faced with more options than ever, and they're only applying to the opportunities that appeal to them the most.** As an employer, it's crucial that you write [enticing job descriptions](#) so that candidates are compelled to apply to your business and not your competitors. Practice [pay transparency](#) by offering [competitive pay and benefits](#) and advertising it in the job posting.

3. Create a job marketing strategy that doesn't rely on job boards.

Compile a list of [custom sources](#) like industry-specific job boards, community message boards, local and university job boards, and email campaigns to customers. Compile another list of employees, friends, and colleagues in your personal network to reach out to for referrals. Our data shows **these sources produce the highest-quality candidates, yet the lowest percentage of applicants.** Plan on targeting them before your next round of hiring.

4. Communicate with candidates faster.

Employers are now quicker to hire, shaving nearly a week off their time-to-hire between 2020 and 2021. You'll want to move fast before your competition scoops up quality candidates. Try [text recruiting](#) to **communicate with candidates faster.** Text messages receive an 8 times higher response rate than email, along with a much faster response time. An applicant tracking system like CareerPlug can also help you [quickly evaluate candidates](#) using a proven hiring process, allowing you to accelerate your hiring decisions without sacrificing quality.
